Databases: SQL

PROJECTS / OPEN-SOURCE

PeerFocus Productivity Video Call App | [Link](#)

JavaScript, WebRTC, Socket.io, HTML, CSS

- Built PeerFocus, a video-based body-doubling tool for distraction-free, Pomodoro-driven study sessions.
- Used WebRTC and Socket.io to enable real-time video communication and session synchronization.
- Automated microphone mute/unmute logic aligned with Pomodoro focus and break intervals, eliminating manual mic control.
- Developed a responsive, focus-first UI using HTML, CSS, and JavaScript.

SmartBanker Voice Banking Interface | [Link](#)

JavaScript, EmailJS, jsPDF, Web Speech API

- Built a voice-controlled online banking simulation to enable hands-free banking interactions.
- Integrated voice commands using JavaScript and the Web Speech API for core banking actions.
- Implemented secure multi-step OTP authentication and dynamic PDF bank statement generation using jsPDF.
- Designed the interface with accessibility and usability in mind to support inclusive digital experiences.

Hotel Management System Hotel Booking & Management Interface | [Link](#)

Java, MySQL

- Engineered a Hotel Management System (HMS) using Java (Swing) and MySQL for room booking and client management.
- Implemented client validation and database-driven business logic for reliable operations.
- Built an interactive admin dashboard to manage bookings and streamline workflows.
- Demonstrated end-to-end application development across UI, logic, and database layers.

CERTIFICATIONS

- Full Stack web development in Java - DUCAT.
- DSA in Java - DUCAT.
- Python for Data Science - NPTEL.

HONORS & AWARDS

- Best Innovative Idea Award, Technovate 2025
